MAYHAM FAMILY REUNION

The members of the Mayham family who attended the annual family reunion held at Jefferson, Schoharie County, New York, on August 19, 1937, will always remember that event as a very enjoyable and interesting occasion, and it was very gratifying to the members of the committee to note the increasing interest on the part of the members of every branch of the family, as was evidenced by the fact that of the nine children of Henry Maham who are known to have had descendants, seven were represented by descendants at the reunion and descendants of the other two were heard from at that time.

Following lunch at the Jefferson Community Hall, a very interesting family meeting was held, at which George W. Veley and Milo H. Mayham, the two surviving grandchildren of Henry Maham, were introduced, and the representatives of each branch of the family present were called upon to rise and be introduced and counted. Mrs. Grace Raymond, the historian of the committee, outlined her work in collecting historical and genealogical information in regard to the family and gave a very interesting account of the family history from the time Henry Maham settled on Blenheim Hill and founded the Mayham family of New York State. A very notable feature of the reunion was the strong feeling of family loyalty and friendship which prevailed on every hand.

It was the unanimous opinion of those present that these reunions should be held every year during the third week in August, and the committee will make arrangements to hold the 1938 reunion during that time, notices of which will be sent to all of the members of the family. The committee urges the members of the family to attend, as we feel that these reunions will result in establishing closer family relationships and an increased appreciation of the value of membership in a pioneer American family which took an active part in the early development of this country and has furnished many useful and outstanding citizens, and will also afford the members of the family an opportunity to enjoy and be inspired by the unusual natural beauty of the locality where the Mayham family originated.

In connection with this report, the committee takes pleasure in presenting a Mayham Family Directory, which gives the names and addresses of the 421 present members of the family of which we have a record, together with their lines of descent from Henry Maham. This directory has been compiled from the extensive historical and genealogical information which it is hoped to complete in time to be issued at the next reunion. Mrs. Raymond, the family historian, has had great difficulty in obtaining early information in regard to Henry Maham, due to the lack of available records covering that period, but it is known that he settled on Blenheim Hill, Town of Blenheim, Schoharie County, New York, sometime during the decade previous to 1800. Henry Maham died in 1843 and the stone at his grave at South Jefferson, N. Y., adjacent to Blenheim Hill, states that he was 91 years old at the time of his death. It is uncertain as to the number of times Henry Maham was married, but it is known that he married Catharine Mac Glothlin, mother of the first ten of the thirteen children of whom we have a record, about 1788, when he was about 36 years of age and she was about 17, and thirteen years after her death, which occurred in 1810, he married Sally (Blass) Rockefeller, widow of Johannes D. Rockefeller, in 1823. No records are available as to the period between the death of Catharine and his marriage to Sally, and it is not known whether he was married previous to his marriage to Catharine. Both Catherine and Sally are buried at South Jefferson, N. Y.

An attempt has been made to make the directory as complete and correct as possible, but in a number of cases where information could not be obtained, or the historian could not be assured of the accuracy of the information furnished, it has been necessary to leave blank spaces, and it is probable that names which ought to have been included have been omitted and that it contains errors in names, addresses and family lines, and one of the purposes in issuing the directory at this time is to enlist the cooperation of the members of the family in correcting errors and obtaining additional information for the historical and genealogical record which is to be issued later.

Wishing all the members of the Mayham family a Happy New Year, and hoping to see you at the next reunion,

Sincerely yours,

2027384

Milo H. Mayham, Chairman, Jefferson, N. Y.

Adaline A. (Dyer) Fuller, Jefferson, N. Y.

MAYHAM FAMILY DIRECTORY

The living descendants of the children of Henry Maham are listed as follows:

	Pages
William and Abigail (Howard) Maham	3 - 4
William and Susan (Maham) Hetherington	5 - 6
John and Betsey Peaslee (Ferguson) Mayham	7 - 10
Henry and Eliza (Frink) Maham	11 - 13
Stephen and Catherine (Van Deusen) Maham	14 - 15
Cornelius and Julia Ann (Reynolds) Maham	16 - 21
James and Catherine (Lee) Mayham	22
Charles and Ellen (Wood) Mayham	23
James and Sally Ann (Maham) Veley	24

The present members of the family are listed on the left in the pages of the Directory and the family line is shown on the right. Numbers refer to generations and lines can be traced by beginning with the names of the present members of the family and following back through the next lowest numbers on the family line to 1 Henry Maham.

The information contained in this Directory has been collected by the Family Historian, Mrs. Percy E. Raymond, of 23 Revere St., Lexington, Mass. Please go over the Directory carefully, particularly that part of it which relates to your immediate family, and notify Mrs. Raymond at once of any omissions or corrections, however slight, also of any additional information relating to the Mayham family which you may have. As the Committee desires to always keep the family records up-to-date, Mrs. Raymond should also be promptly notified of all marriages, births, deaths and changes of address of members of the family. Your cooperation in this matter will be greatly appreciated.

1. The first part of the manuscript is devoted to a general introduction of the subject.
2. The second part contains a detailed description of the experimental apparatus.
3. The third part describes the results of the experiments.
4. The fourth part discusses the theoretical aspects of the problem.
5. The fifth part presents a comparison of the experimental results with the theoretical predictions.
6. The sixth part concludes the work and suggests directions for further research.
7. The seventh part contains a list of references.
8. The eighth part is a list of figures and tables.
9. The ninth part is a list of symbols and abbreviations.
10. The tenth part is a list of footnotes.

The manuscript is written in a clear and concise style, and the results are presented in a logical and systematic manner. The author has made a significant contribution to the field of research, and the work is well worth the attention of the scientific community.

The author is to be commended for the high quality of the work, and the results are of great interest. The manuscript is well written and the results are presented in a clear and concise manner. The author has made a significant contribution to the field of research, and the work is well worth the attention of the scientific community.

1. The first part of the paper is devoted to the study of the

properties of the function $f(x)$ defined by the equation

$$f(x) = \int_0^x f(t) dt + \int_0^x f(t) dt + \dots$$

It is shown that the function $f(x)$ is continuous and

differentiable at every point of the interval $[0, 1]$.

2. In the second part of the paper the function $f(x)$ is

studied in the case when the function $f(x)$ is defined by the equation

$$f(x) = \int_0^x f(t) dt + \int_0^x f(t) dt + \dots$$

It is shown that the function $f(x)$ is continuous and differentiable at every point of the interval $[0, 1]$.

3. In the third part of the paper the function $f(x)$ is

studied

in the case when the function $f(x)$ is defined by the equation

$$f(x) = \int_0^x f(t) dt + \int_0^x f(t) dt + \dots$$

It is shown that the function $f(x)$ is continuous and differentiable at every point of the interval $[0, 1]$.

4. In the fourth part of the paper the function $f(x)$ is studied in the case when the function $f(x)$ is defined by the equation

$$f(x) = \int_0^x f(t) dt + \int_0^x f(t) dt + \dots$$

1. The first part of the paper is devoted to a general discussion of the problem.

2. The second part is devoted to a detailed study of the case of a single particle. In this case the problem is reduced to the solution of a system of ordinary differential equations. The solution of this system is obtained in explicit form. The results of the calculation are presented in the form of a table.

3. The third part is devoted to a study of the case of a system of particles. In this case the problem is reduced to the solution of a system of partial differential equations. The solution of this system is obtained in explicit form. The results of the calculation are presented in the form of a table.

4. The fourth part is devoted to a study of the case of a system of particles. In this case the problem is reduced to the solution of a system of partial differential equations. The solution of this system is obtained in explicit form. The results of the calculation are presented in the form of a table.

5. The fifth part is devoted to a study of the case of a system of particles. In this case the problem is reduced to the solution of a system of partial differential equations. The solution of this system is obtained in explicit form. The results of the calculation are presented in the form of a table.

6. The sixth part is devoted to a study of the case of a system of particles. In this case the problem is reduced to the solution of a system of partial differential equations. The solution of this system is obtained in explicit form. The results of the calculation are presented in the form of a table.

7. The seventh part is devoted to a study of the case of a system of particles. In this case the problem is reduced to the solution of a system of partial differential equations. The solution of this system is obtained in explicit form. The results of the calculation are presented in the form of a table.

8. The eighth part is devoted to a study of the case of a system of particles. In this case the problem is reduced to the solution of a system of partial differential equations. The solution of this system is obtained in explicit form. The results of the calculation are presented in the form of a table.

9. The ninth part is devoted to a study of the case of a system of particles. In this case the problem is reduced to the solution of a system of partial differential equations. The solution of this system is obtained in explicit form. The results of the calculation are presented in the form of a table.

10. The tenth part is devoted to a study of the case of a system of particles. In this case the problem is reduced to the solution of a system of partial differential equations. The solution of this system is obtained in explicit form. The results of the calculation are presented in the form of a table.

11. The eleventh part is devoted to a study of the case of a system of particles. In this case the problem is reduced to the solution of a system of partial differential equations. The solution of this system is obtained in explicit form. The results of the calculation are presented in the form of a table.

12. The twelfth part is devoted to a study of the case of a system of particles. In this case the problem is reduced to the solution of a system of partial differential equations. The solution of this system is obtained in explicit form. The results of the calculation are presented in the form of a table.

13. The thirteenth part is devoted to a study of the case of a system of particles. In this case the problem is reduced to the solution of a system of partial differential equations. The solution of this system is obtained in explicit form. The results of the calculation are presented in the form of a table.

14. The fourteenth part is devoted to a study of the case of a system of particles. In this case the problem is reduced to the solution of a system of partial differential equations. The solution of this system is obtained in explicit form. The results of the calculation are presented in the form of a table.

Section 1

Chapter 1. Introduction. The purpose of this study is to investigate the effects of the proposed system on the performance of the system.

The first part of the study is a literature review of the existing research on the topic. The second part is a description of the proposed system and its components.

The third part is a description of the experimental setup and the data collection process. The fourth part is a description of the results of the experiment.

The fifth part is a discussion of the results and their implications. The sixth part is a conclusion and a list of references.

The seventh part is a list of appendices. The eighth part is a list of figures and tables. The ninth part is a list of symbols and abbreviations.

The tenth part is a list of footnotes. The eleventh part is a list of references. The twelfth part is a list of appendices.

The thirteenth part is a list of figures and tables. The fourteenth part is a list of symbols and abbreviations. The fifteenth part is a list of footnotes.

The sixteenth part is a list of references. The seventeenth part is a list of appendices. The eighteenth part is a list of figures and tables.

The nineteenth part is a list of symbols and abbreviations. The twentieth part is a list of footnotes. The twenty-first part is a list of references.

The twenty-second part is a list of appendices. The twenty-third part is a list of figures and tables. The twenty-fourth part is a list of symbols and abbreviations.

The twenty-fifth part is a list of footnotes. The twenty-sixth part is a list of references. The twenty-seventh part is a list of appendices.

The twenty-eighth part is a list of figures and tables. The twenty-ninth part is a list of symbols and abbreviations. The thirtieth part is a list of footnotes.

The thirty-first part is a list of references. The thirty-second part is a list of appendices. The thirty-third part is a list of figures and tables.

Chapter 2. Literature Review. This chapter reviews the existing research on the topic of the study.

The first part of the chapter is a review of the research on the effects of the proposed system on the performance of the system.

The second part is a review of the research on the effects of the proposed system on the performance of the system.

The third part is a review of the research on the effects of the proposed system on the performance of the system.

The fourth part is a review of the research on the effects of the proposed system on the performance of the system.

The fifth part is a review of the research on the effects of the proposed system on the performance of the system.

The sixth part is a review of the research on the effects of the proposed system on the performance of the system.

The seventh part is a review of the research on the effects of the proposed system on the performance of the system.

The eighth part is a review of the research on the effects of the proposed system on the performance of the system.

The ninth part is a review of the research on the effects of the proposed system on the performance of the system.

The tenth part is a review of the research on the effects of the proposed system on the performance of the system.

The eleventh part is a review of the research on the effects of the proposed system on the performance of the system.

The twelfth part is a review of the research on the effects of the proposed system on the performance of the system.

The thirteenth part is a review of the research on the effects of the proposed system on the performance of the system.
